

## UNIVERSITY OF PÉCS FACULTY OF SCIENCES

### QUALITY ASSURANCE

**STUDENTS.** As part of the oldest university in Hungary, our goal is to provide natural sciences education on all levels fulfilling the requirements of modern and high-quality higher education to make our faculty the first choice of talented and motivated students of the region entering higher education. We also aspire to provide our students with knowledge fulfilling the expectations of the national and international job market. We are dedicated to increase the number of international students continuously. We are determined to strengthen the relationship between graduated students and their alma mater.

**STAFF.** We pay full attention to the physical and mental well-being of our staff members; to recognize, develop and reward excellence in education, in research and in practical activities, covering all research fields of our Faculty. We aim for excellent partnerships with students and universities of other countries. We provide conditions and environment where the circulation of knowledge and technology is fully supported.

**RESEARCH EXCELLENCE.** We conduct cooperative research activities focusing on relevant scientific, social, economic, cultural and environmental challenges. We establish an atmosphere supporting innovative ideas and motivation. We support research collaborations with other higher education institutions, companies and other national and international organizations. We increase the recognition and social acceptance of our research findings by using media and other information channels. We determine the research domains of our Faculty based on the strengths of our institutes and ensure that these domains are in harmony with our long-term strategic goals.

**COOPERATION.** We aim for establishing professional relationships with organizations outside of academia, which increases the chances of our students in the job market and facilitates research activities, and knowledge transfer. We also intend to develop research and cooperative relations with other universities, regional, national and international organizations and companies. We pay special attention to the relations with the teachers of the secondary education institutions of the region, we play an active role in talent management on secondary education level.

**TECHNOLOGY.** We aim to develop into a „borderless” digital Faculty by surpassing our physical restraints. We use the most modern and up-to-date digital technology in both our research and teaching activities. We provide enriched learning experience with various multimedia applications. We improve our infrastructure constantly. We aim for high quality and constant online presence.

**MARKETING.** We reinforce our reputation and establish an international trademark via our marketing activities. We have effective communication with the partners of the university. We inspire the leaders and other actors (including students, staff members, alumni and honorary professors) of the university to be integral part of university life.

**SUSTAINABILITY.** Our operation fulfills the requirements of environmental and economic sustainability showing positive example to others. We are constantly searching for and using environment-friendly solutions. We aim for stable financing system and ensure financial sustainability. Through our research activities we are searching for solutions of global environmental, economic and social problems.

**QUALITY MANAGEMENT.** To implement our goals, we have an effective quality management system in place, which guarantees the constant and excellent quality of our services, their continuous development, the management of risks, and as a consequence, the satisfaction of our students, staff members and partners. We ensure to conduct our educational and research activities following the law and regulations of the relevant authorities under regulated and supervised circumstances. We are dedicated to the maintenance and continuous improvement of our quality management system.
